

A Hartford HealthCare Partner

CONTINUING EDUCATION for EMS

Prehospital Management of Patients with Ventricular Assist Devices (VADs)

Jason A. Gluck, DO

Medical Director, Mechanical Circulatory Support/ECMO
Program Director, Advanced Heart Failure and Transplant Fellowship
Heart Failure and Transplant Specialist – Hartford Hospital
Assistant Professor of Medicine – University of Connecticut School of Medicine

Dr. Gluck co-authored the recent AHA Scientific Statement regarding CPR in patients with mechanical circulatory support devices which is the first published guidance on when to initiate CPR for VAD patients.

Please join us as Dr. Gluck de-mystifies the workings of ventricular assist devices and provides practical information and advice for EMS when responding to patients with VADs.

Tuesday November 20, 2018 from 7pm-9pm
Pizza and Soda at 6:30pm

Room 221, ERC Building

Please email David.Bailey@hhchealth.org to register.

Free parking is available in the Hartford Hospital employee garage on Hudson Street next to the ERC/ERD building. See next page for details.

Free parking is available for this event in the Hartford Hospital Employee Garage located at 510 Hudson Street next to the ERC/ERD building. Use the intercom button at the access control point to buzz the guard and tell them you are here for the EMS Continuing Education Event so they will raise the gate for you.

You will need to exit and enter the garage at street level. Take a left out of the garage and follow the sidewalk to the next building (ERC - circular driveway in front). You will need to obtain a visitor badge from the guard. Take the stairs or elevator to the second floor and room 221.
